eh 1
eh 3
eh 5
eh 7
Label: window/threshold (threshold-timed), then event-timed
(b) Localization time and growth rate
5.75/σ1
median time of the label
h = 0.3–0.7
Median time of the label
e-folding time 1/σ1 (points: amplitude A)
(c) Delay from smaller or larger offsets
scale 0.125
scale 0.25
scale 0.5
scale 2
scale 4
Measured median delay
Predicted delay ln(1/s)/σ1
(d) Linear theory against offset size
Floquet filter, fixed amplitude
Floquet filter, offset-pool bin
v2, fixed amplitude
v2, offset-pool bin
Floquet filter, h = 0.4, 0.6
v2, h = 0.4, 0.6
Within ±1 on test (%)
Offset size over distance above threshold, ηmax/(A − Ac)
(e) Amplitude
specialist per amplitude
wide model
trained on 1.65–1.85
25%
50%
Within ±1 on test (%)
Swing amplitude A (rad); band: 1.65–1.85
(f) Ring size
rival 2%
rival 20%
rival 49%
rival 71%
N = 100 model on other rings
N = 200, 400 models at N = 100
trained on its own ring
Within ±1 on test (%)
Ring size N
